LAB FACILITY

Machine Shop

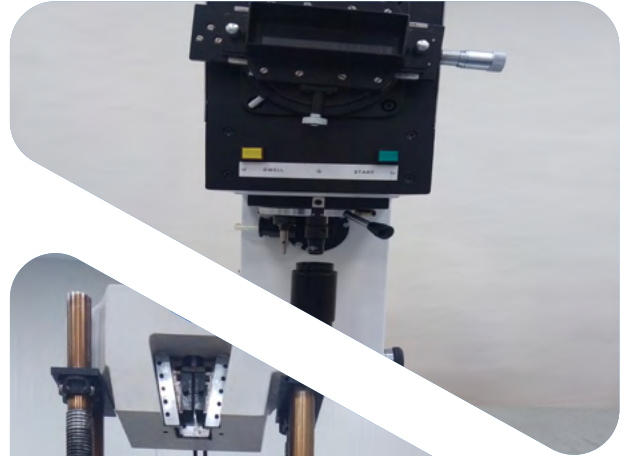

Modern machine shop equipped for precision machining, supporting specimen preparation and testing.

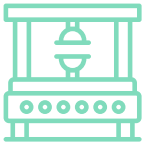

Mechanical Lab

Well-equipped mechanical laboratory designed for precise material testing and performance assessment.

Metallurgical Lab

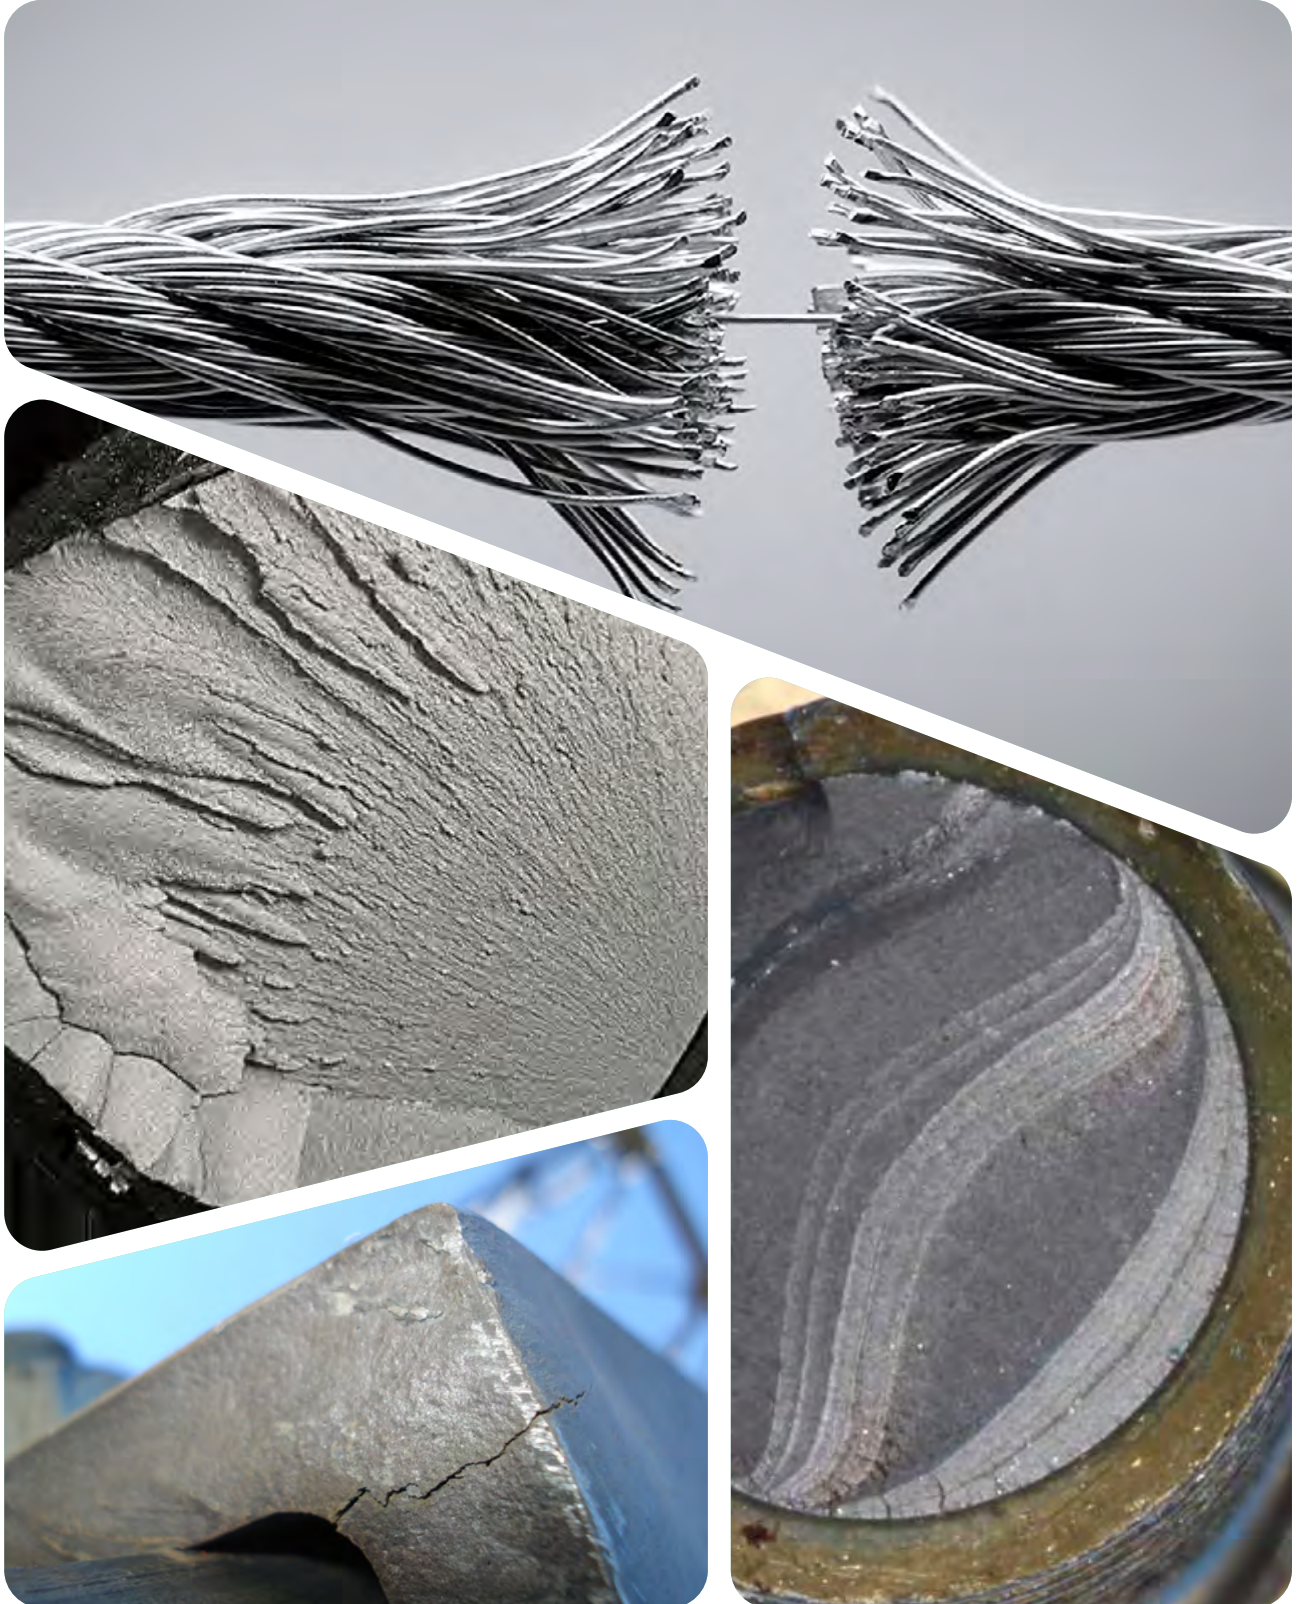

Specialized metallurgical laboratory supporting in-depth material investigation and quality assessment.

Failure Analysis

Dedicated failure analysis laboratory delivering accurate root-cause determination and corrective insights.

Chemical Lab

Advanced chemical laboratory enabling accurate material analysis and composition assessment.

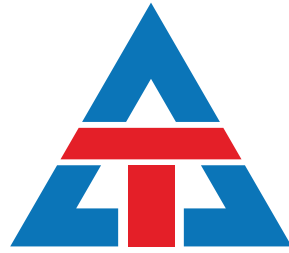

Corrosion Lab

Specialized corrosion laboratory supporting material degradation analysis and resistance evaluation.

TRANS ASIA

Industrial Laboratories

- ▮ Precision
- ▮ Quality
- ▶ Reliability

Your trusted partner in Testing, Inspection and NDT Services – delivering unmatched quality, reliability, and performance for every industrial need.
